## Description

Built as an electric cruising cat from the ground up, this 2018 Voyage 480E “Electrified” pairs Voyage’s proven offshore platform with a robust Oceanvolt/Valence/Solbian/Victron energy architecture designed to reduce generator run time and support extended off-grid cruising.

This is a boat for owners who want modern energy independence without giving up the comfort and volume that make the Voyage 480 such a respected liveboard and passagemaking catamaran. Under power, electric drive delivers a noticeably quieter experience than conventional propulsion, with substantial onboard charging capability to match real-world cruising needs.

## Information & Features

### Oceanvolt SD15 (Engine 1)

Engine Type:	<b>Inboard</b>	Power:	<b>30 hp</b>
Fuel Type:	<b>Electric</b>		
Drive Type:	<b>Sail Drive</b>
